Yerkes Study Group
Agenda
April 20, 2007

We will continue planning our coordination with Doug Sarno - discussion of the process he will undertake, and the preliminary list of interviewees.

We will continue to review the model science centers. Judy has sent all of you lists of places to consider, so everyone has some homework. Please identify interesting (= relevant or worth discussing) aspects of these model centers that you can share with the group.

Judy will review some summary data for science centers gleaned from the National Science and Technology Center (NSTC) data books.

Jim G. will mention some comments being sent in that deserve discussion.

Misc. updates: reporting to the Village; contacts with the Graham School at UofC and the Milwaukee Public Museum.

Discuss the nature and contents of the preliminary report due in June.
