

Agenda - Yerkes Study Group

9 March 2007

1) what is the plan of action, and how much time will it take?

possible plan of action:

- a) derive the nature of the programs, in as much detail as possible**
- b) create the operations plan (who does what), and the annual costs associated with those operations (including long-term capital improvements etc.)**
- c) devise a management plan, e.g. what the partnership looks like, both operationally and legally**
- d) propose a funding scheme**

can we do these tasks in parallel?

2) discussion of how we approach a) above.

- input from current users, e.g. teachers**
- collect data on science centers near and far - who they serve, how they work**
- collect community input -- what mission would best serve the local region?**
- review architectural firm's thoughts concerning programs**

3) communications: web site, "Yerkes cafe," presentation to Village Board, responding to comments, etc.

4) schedule for future meetings
